SYMPOSIUM ON CHALLENGES IN APPLIED HUMAN BIOMETEOROLOGY

Monday, March 02, 2020 Version: 27.02.2020

Location: Peterhof

08:00 – 09:30 Registration

Opennings and logistical information, Location: Haus zur Lieben Hand

09:30 - 10:15	Prof. Dr. Dr. h.c. Hans-Jochen Schiewer, Rector, Univ. Freiburg
	Prof. Dr. Gerhard Adrian, DWD and WMO President
	Prof. Dr. Andreas Christen, University of Freiburg
	Prof. Dr. Andreas Matzarakis, ZMMF/DWD

Plenary session A, Location: Haus zur Lieben Hand Chairperson: Oded Potchter and Andreas Matzarakis

10:15 – 10:45	The long way from one parameter indices to complex and universal
	thermal models of the human body, Peter Höppe, Münchner
	Universitätsgesellschaft, Germany
10:45 – 11:00	The recent summers in Germany - heat waves and their impact on
	human health, Stefan Muthers, Deutscher Wetterdienst/ZMMF, Germany
11:00 – 11:15	A Masterplan for the Implementation of Heat Health Action Plans in
	Germany, Hans-Guido Mücke, Umweltbundesamt, Germany
11:15 – 11:30	Climate services for future bioclimatic assessment in Portugal,
	António Lopes, Ezequiel Correia, Marcelo Fragoso and João
	Vasconcelos, Institute of Geography and Spatial Planning of the
	University of Lisbon (IGOT), Portugal
11:30 – 11:45	Pollen information services for general public, Tanja Cegnar, Andreja
	Kofol Seliger and Anja Simčič, Slovenian Environment Agency, Slovenia
11:45 – 12:00	Combined ground-level ozone and temperature events relevant for
	human health, Elke Hertig and Sally Jahn, Regional Climate Change and
	Health, Faculty of Medicine, Augsburg University, Germany

12:00 - 13:30	Lunch

Session A: Health, Location: Haus zur Lieben Hand

Chairperson: Panagiotis Nastos

10.00 10.15	Detailed analysis of automorphist control of Carleia
13:30 – 13: 45	Detailed analysis of extreme heat waves in Serbia,
	Biljana Basarin, Tin Lukić, Tanja Micić Ponjige, Slobodan B. Marković,
	Dragoslav Pavić, Minučer Mesaroš and Andreas Matzarakis, Department
	of Geography, Tourism and Hotel Management, Faculty of Sciences,
	University of Novi Sad, Serbia
13:45 – 14:00	Assessment of impacts of extreme heat on global health using
	human thermoregulation models and indices, Maria Albers, Janica
	Bühler, Beatrice Ellerhoff, Elisa Ziegler and Kira Rehfeld, Hannover
	Medical School (MHH), Germany
14:00 – 14:15	Evaluation of the ERA5-based UTCI on mortality data in Europe, Aleš
	Urban, Claudia Di Napoli, Fiorella Acquaotta, Hannah L. Cloke, Jan
	Kyselý and Florian Pappenberger, Institute of Atmospheric Physics of the
	Czech Academy of Sciences, Czech Republic
14:15 – 14:30	Residents' Perceptions and Attitudes Towards Winter in Cold
	Climate City Erzurum, Turkey, Defne Dursun and Dogan Dursun,
	Ataturk University, Turkey
14:30 – 14:45	Impact of biometeorological and aerosanitary conditions on
	influenza-like ilnesses incidence in Warsaw, Katarzyna Lindner-
	Cendrowska and Peter Bröde, Institute of Geography and Spatial
	Organization Polish Academy of Science, Poland
14:45 – 15:00	Vulnerability to heat-related mortality during the summer of 2015:
	evidence for an urban population in Central European city (Novi Sad,
	Serbia), Daniela Arsenović, Stevan Savić, Zorana Lužanin, Ivana Radić,
	Dragan Milošević and Miodrag Arsić, Climatology and Hydrology
	Research Centre, Faculty of Sciences, University of Novi Sad, Serbia
15:00 – 15:15	Relationship between weather and the occurence of respiratory and
	ischemic heart diseases in Germany, Irmela Schlegel, Stefan Muthers,
	Hans-Guido Mücke and Andreas Matzarakis, Deutscher
	Wetterdienst/ZMMF, Germany
15:15 – 15:30	Saharan dust intrusions over southern Portugal: overall
	characterization and atmospheric synoptic patterns (2005-2015), M.
	Fragoso, T. Silva, E. Correia, J. Vasconcelos, A. Lopes and M.G.
	Carraça, Centre of Geographical Studies - Institute of Geography and
	Spatial Planning, University of Lisbon, Portugal

Session B: Bioclimate in Urban Environments, Location: KG III, 3042

Chairperson: Antonio Lopes

13:30 – 13:45	Seasonal microclimatic and thermal comfort conditions in various built-up and green areas of Ghent (Belgium), Dragan Milošević, Sara Top, Steven Caluwaerts and Stevan Savić, Climatology and Hydrology Research Centre, Faculty of Sciences, University of Novi Sad, Serbia
13:45 – 14:00	Analysing Outdoor Thermal Comfort with Proximity to Water Bodiesin Tropical Humid Climate- Case Study of Kolkata, India, Rohini Mazumder Chakraborty and Debashish Das, Department of Architecture, Jadavpur University, India

14:00 – 14:15	Modeling the urban geometry influence on outdoor thermal comfort in the case of semi aride microclimate, Chahrazed Kedissa and Saliha Outtas, Laboratoire d'architecture bioclimatique et environnement (abe), Algeria
14:15 – 14:30	Influence of Thermal Comfort provided by Tree Shadows on
	sidewalks in Downtown São Paulo, Loyde Vieira de Abreu-Harbich, G.
	G. D. Starke, P. F. Brocaneli, C. R. Maciel and S. H. Obata, Mackenzie
	Presbyterian University, Brazil
14:30 - 14:45	Latitude-dependent analysis of microclimatic conditions in ideal
	urban canyons, Kerstin Reusch and Andreas Matzarakis, Deutscher
	Wetterdienst /ZMMF, Germany
14:45 – 15:00	Detailed investigation of microclimate by means of computational
	fluid dynamics (CFD) in a tropical urban environment, Omer
	Muhammad Mughal, Aytac Kubilay, Paolo Burlando, Simone Fatichi,
	Naika Meili and Jan Carmeliet, Singapore ETH Center, Singapore
15:00 – 15:15	Cool spots as strategy for urban heat, Laura Kleerekloper and Jeroen
	Klok, Amsterdam University of Applied Science, Netherlands
15:15 – 15:30	Bioclimate, Urban heat Island and Urban development, Elena A.
	Grigorieva, Institute for Complex Analysis of Regional Problems Far
	Eastern Branch Russian Academy of Sciences, Russia

Location: Peterhofkeller

15:30 - 16:30 Poster vi	ewing and Coffeebreak
--------------------------------	-----------------------

Session C: New methods and tools in Human Biometeorology, Location: Haus zur Lieben Hand

Chairperson: Fredrick Lindberg

16:30 – 16:45	R language, a powerful tool for biometeorological research, loannis
	Charalampopoulos, Laboratory of General and Agricultural Meteorology,
	Agricultural University of Athens, Greece
16:45 – 17:00	Evaluation and application of a low-cost measurement approach for
	urban air temperatures during record-dry summer 2018, Moritz
	Gubler, Andreas Christen, Jan Remund and Stefan Brönnimann,
	University of Bern, Switzerland
17:00 – 17:15	Discrepancies of the radiation component between different thermal
	comfort models - implications and solutions, Fredrik Lindberg, Nils
	Wallenberg, Björn Holmer and Sofia Thorsson, University of Gothenburg,
	Sweden
17:15 – 17:30	On the modification of the local microclimate by clusters of trees,
	Christos C. Halios, Stefan T. Smith, Brian Pickles and Li Shao, School of
	Built Environment, University of Reading, United Kingdom
17:30 – 17:45	Innovative methodology for the monitoring of urban environments'
	risks to health, Izhak Schnell, Tel Aviv University, Israel
17:45 – 18:00	GrüneLunge-Project - Potential of the urban green infrastructure to
	reduce heat stress, Marcel Gangwisch and Andreas Matzarakis,
	Deutscher Wetterdienst/ZMMF, Germany

Session D: Communication and warnings, Location: KG III, 3042

Chairperson: Stefan Muthers

16:30 – 16:45	Thermal walks for fundamental and applied research, Lisette Klok,
10.30 - 10.43	••
	Jeroen Kluck, Erica Caverzam Barbosa and Anna Solcerova, University
	of Applied Sciences Amsterdam, Netherlands
16:45 – 17:00	Revision of the Swiss heat warning system – indices comparison
	and recent developments, Annkatrin Burgstall, Ana Casanueva, Regula
	Gehrig and Sven Kotlarski, Bundesamt für Meteorologie und Klimatologie
	MeteoSchweiz, Switzerland
17:00 – 17:15	Indoor conditions during heat waves - Nocturnal part of the heat
	health warning system, Ronja Vitt, Stefan Muthers and Andreas
	Matzarakis, Deutscher Wetterdienst/ZMMF, Germany
17:15 – 17:30	Pollen forecast - latest developments at DWD, Christina Endler,
	Deutscher Wetterdienst/ZMMF, Germany
17:30 – 17:45	Importance of Atmosphere Related Syndroms in historical context
	and future possible developments, Kathrin Graw, Stefan Muthers and
	Andreas Matzarakis, Deutscher Wetterdienst/ZMMF, Germany
17:45 – 18:00	

Location: Peterhofkeller

18:30 - 20:30	Reception and welcome party
	Martin Horn, Mayor Freiburg

Tuesday, March 03, 2020

Plenary session B, Location: Haus zur Lieben Hand

Chairperson: Andreas Christen

08:30 - 08:45	Supporting sun protection: UV index forecasts of the Deutscher Wetterdienst, Gudrun Laschewski and Andreas Matzarakis, Deutscher
	Wetterdienst/ZMMF, Germany
08:45 - 09:00	Urban Climate, Air Quality and Human Comfort in the South-Eastern
00.10 00.00	Europe: Advancements and Challenges within the Climate Change
	Context, Sorin Cheval, Adina Croitoru, Jelena Dunjic, Christos
	Giannaros, Dragan Milosevic, Nina Nikolova, Rita Pongrácz, Stevan
	Savic and Róbert Szép, "Henri Coandă" Air Force Academy, Brasov,
	Romania
09:00 - 09:15	Modelling of continuous Sky View Factor based on ultra-high
	resolution natural color images taken by Remotely Piloted Airborne
	Systems. The case study of a complex building environment in the
	campus of National and Kapodistrian University of Athens,
	Panagiotis T. Nastos, Emmanuel Vassiliakis, Marina Panagiotis P.
	Nastos, Ioannis Charalampopouluos and Andreas Matzarakis, Laboratory
	of Climatology and Atmospheric Environment, Department of Geology
	and Geoenvironment, National and Kapodistrian University of Athens,
	Greece

09:15 - 09:30	Urban thermal stress map based on human perception in urban
	areas, Tzu-Ping Lin and Yu-Cheng Chen, Department of Architecture,
	National Cheng Kung University, Taiwan
09:30 - 09:45	Advocating a Human Thermal Perception Protocol for Bio-
	Meteorological Research, Oded Potchter, Pninit Cohen, Tzu-Ping Lin
	and Andreas Matzarakis, The Laboratory for Urban Climatology and Bio-
	Climatology, Department of Geography and Human Environment Tel Aviv
	University, Israel
09:45 - 10:00	Strengthening interdisciplinary bridges between human
	biometeorology with that of bottom-up urban thermal sensitive
	design in an era of climate change, Andre Santos Nouri, Department of
	Interior Architecture and Environmental Design, Faculty of Art, Design
	and Architecture, Bilkent University, Turkey

10:00 - 11:00	Poster viewing and Coffeebreak

Session E1: Thermal indices, Location: Haus zur Lieben Hand

Chairperson: Peter Höppe

11:00 – 11:15	Anisotropic longwave sky radiation, Björn Holmer, Nils Wallenberg and
11.00 - 11.13	
	Fredrik Lindberg, University of Gothenburg Dept of Earth Sciences,
	Sweden
11:15 – 11:30	UTCI calibration for a tropical Brazilian city and the influence of the
	sample size upon the calibration process, Thiago José Vieira Silva
	and Simone Queiroz da Silveira Hirashima, Department of Civil
	Engineering, Federal Center of Technological Education of Minas Gerais
	(CEFET-MG), Brazil
11:30 – 11:45	Thermal Comfort Index Calibration: review and analysis of statistical
	methods used, Larissa Mara Costa Morais and Simone Queiroz da
	Silveira Hirashima, Federal Center of Technological Education of Minas
	Gerais, Brazil
11:45 – 12:00	The influence of warm weather and outdoor-environment design on
	preschoolers' physical activities and thermal comfort, Sofia
	Thorsson, Oskar Bäcklin, Fredrik Lindberg and David Rayner, University
	of Gothenburg, Sweden
12:00 – 12:15	Modified Physiologically Equivalent Temperature (mPET) to
	investigate biometeorological conditions and seasonal power
	demand in tropic region, Yung-Chang Chen, Wei-Chieh Chang, Chien-
	Ke Cheng, Chien-Hung Andy Tung, Wei-Nai Chen, Charles CK. Chou
	and Andreas Matzarakis, Research Center for Environmental Changes,
	Academia SINICA, Taiwan
12:15 – 12:30	

Session F: Climate Change, Location: KG III, 3044

Chairperson: Sorin Cheval

11:00 – 11:15	Urbanization Induced Temperature Rise over Eastern India: A
	Primary Appraisal to Estimate Urban Climate Change, Partha Pratim

	Gogoi and V. Vinoj, School of Earth, Ocean and Climate Sciences, Indian Institute of Technology Bhubaneswar (IIT BBS), India
11:15 – 11:30	Predictions and Projections of Heat Exposure on European Scales:
	The HEAT-SHIELD Project, Sven Kotlarski, Annkatrin Burgstall, Ana
	Casanueva and Christoph Spirig, Federal Office of Meteorology and
	Climatology MeteoSwiss, Switzerland
11:30 – 11:45	Estimating the future thermal comfort in Lisbon, João Vasconcelos,
	Ezequiel Correia, Marcelo Fragoso, Ana Oliveira and António Lopes,
	Instituto de Geografia e Ordenamento do Território Politécnico de Leiria,
	Portugal
11:45 – 12:00	Thermal climate and case studies on urban heat island during
	heatwaves in coastal city of Helsinki, Finland, Reija Ruuhela,
	Athanasios Votsis, Olli Saranko and Carl Fortelius, Finnish Meteorological
	Institute, Finland
12:00 – 12:15	Urban air quality under climate change – overview and the role of
	biogenic emissions, Markus Quante, Josefine Feldner, Matthias Karl,
	Volker Matthias and Martin Ramacher, Helmholtz-Zentrum Geesthacht,
	Institute of Coastal Research, Germany
12:15 – 12:30	Adaptation for the impact of climate change in biometeorological
	field, Jun-Ichiro Giorgos Tsutsumi, University of the Ryukyus, Japan

Location: Peterhofkeller

12:30 – 14:00

Session E2: Thermal indices, Location: Haus zur Lieben Hand

Chairperson: Tzu-Ping Lin

14:00 – 14:15	Human Thermal Perception and Adaptation in a World of Population
	Mobility, Pninit Cohen and Oded Potchter, The Laboratory for Urban
	Climatology and Bio-Climatology, Department of Geography and Human
	Environment, Tel Aviv University, Israel
14:15 – 14:30	Define the thermal comfort range based on different generation in
	the same climate region, Shing-Ru Yang and Tzu-Ping Lin, National
	Cheng Kung University, Taiwan
14:30 - 14:45	Uncertainties and errors in heat sensation inferential model and
	their feedbacks in climate-conscious urban planning, Manon Kohler
	and Winston T.L. Chow, Singapore Management University, Singapore
14:45 – 15:00	The Evaluation of the Effects of New Settlement Areas on the
	Thermal Comfort in a Cold Climate City: Erzurum Case, Dogan
	Dursun and Merve Yavas, Ataturk University, Turkey
15:00 – 15:15	
15:15 – 15:30	Climate and Sports Events - The Tokyo 2020 Olympic Games,
	Dominik Fröhlich, Stéphane Bermon, Paolo Emilio Adami and Andreas
	Matzarakis, Deutscher Wetterdienst/ZMMF, Germany

Session G: Bioclimate, planning and design, Location: KG III, 3044

Chairperson: Andre Nouri

14:00 – 14:15	Assessment of thermal environment and air quality in Compact Built Environment in Hot-Humid Regions, Si-Yu Yu, Andreas Matzarakis and Tzu-Ping Lin, Department of Architecture, National Cheng Kung University Taiwan, Taiwan
14:15 – 14:30	Microclimate modelling to support climate change adaptation in densifying cities, Sabrina Erlwein and Stephan Pauleit, Chair for Strategic Landscape Planning and Management, Technical University of Munich, Germany
14:30 – 14:45	An exploration of a latitude based street-level density manipulation for climate sensitive urban street design, Nusrath Maharoof, Rohinton Emmanuel and Craig Thomson, School of Computing, Engineering and Built Environment, Glasgow Caledonian University, United Kingdom
14:45 – 15:00	Planting trees in urban areas using Computer Decision Making algorithms, Nils Wallenberg and Fredrik Lindberg, University of Gothenburg, Sweden
15:00 – 15:15 15:15 – 15:30	Urban Spatial Patterns and Heat Vulnerability in the City of Tel Aviv, Moshe Mandelmilch, Noa Mandelmilch, Michal Ferenz and Oded Potchter, Dept. of Geography and Human Environment, Israel

15:30 - 16:15	Coffeebreak

Plenary session C, Location: Haus zur Lieben Hand

Chairperson: Andreas Christen and Andreas Matzarakis

16:15 – 16:30	Future perspectives on micro scale modelling and communication aspects in human biometeorology, Andreas Matzarakis, Deutscher Wetterdienst/ZMMF, Germany
16:30 – 16:45	Future perspectives at the intersection between urban climate and human biometeorology, Andreas Christen, University Freiburg,
	Germany
16:45 – 17:15	Closing-ceremony

Poster session, Location: Peterhofkeller

43	A new approach of generating human biometeorological information based on gridded high-resolution data (basic data of Test-Reference-Years), Irmela Schlegel and Andreas Matzarakis, Deutscher Wetterdienst/ZMMF, Germany
64	Implementation of human thermal comfort and air humidity in Köppen-Geiger climate classification and importance towards the achievement of Sustainable Development Goals, Shi-Qi Yang and Andreas Matzarakis, Shenzhen Institute of Building Research Co., Ltd.Shenzhen, China
97	Variability and changes in bioclimatic parameters in Estonia – preliminary findings, Biljana Basarin, Tiiu Koff, Andreas Matzarakis, Jaak Jaagus, Slobodan B. Marković and Tin Lukić, Department of Geography, Tourism and Hotel Management, Faculty of Sciences, University of Novi Sad, Serbia
105	Review of outdoor thermal comfort research in urban areas of Central and South East Europe, Jelena Dunjić, Dragan Milošević, Stevan Savić, Daniela Arsenović and Ivan Šećerov, University of Novi Sad, Faculty of Sciences, Department of Geography, Tourism and Hotel Management, Serbia
72	Effects of street design on outdoor thermal comfort during record- breaking heat and cold periods in Novi Sad, Serbia, Stevan Savić, Dragan Milošević, Daniela Arsenović, Jelena Dunjić and Andreas Matzarakis, Climatology and Hydrology Research Centre, Faculty of Sciences, University of Novi Sad, Serbia
103	Seasonal variations of UTCl and PET in Belgrade (Serbia), Milica Pecelj, Geographical Institute 'Jovan Cvijić' Serbian Academy of Science and Arts, Belgrade, Serbia
52	Climate sensitivity of an historical places in cold climate zone: The Case of Erzurum, Merve Yavas and Dogan Dursun, Ataturk University, Türkey
145	Human thermal comfort modeling against mobile measurements in a green-urban area of Athens, Greece. Adaptation and mitigation recommendations, Panagiotis T. Nastos, Iliana D. Polychroni, Ioannis Charalampopoulos, Aikaterini Varvaringou and Ioannis Tsiros, Laboratory of Climatology and Atmospheric Environment, Department of Geology and Geoenvironment, National and Kapodistrian University of Athens, Greece
120	Biometeorological footprint on crime incidence over the greater Athens area, Greece, Iliana A. Petta and Panagiotis T. Nastos, Laboratory of Climatology and Atmospheric Environment, National and Kapodistrian University of Athens, Greece
118	Bioclimatological assessment of Camino de Santiago, Domingo Rasilla, Department of Geography and Environmental Planning, University of Cantabria, Spain
116	Deepening the knowledge of urban climate and human thermal comfort conditions: an approach based on local weather types, Cláudia Reis, António Lopes and André Nouri, Universidade de Lisboa -
	IGOT (Institute of Geography and Spatial Planning), Portugal
88	Study on Riparian Shading Envelope for Wetlands to Create Desirable Urban Bioclimates, Abu Taib Mohammed Shahjahan, Khandaker Shabbir Ahmed and Ismail Bin Said, American International University-Bangladesh, Bangladesh Cooling Effect of Green and Blue Spaces in Urban Requalification

Impact Analysis of Dynamic Bluespace on Human Biometeorology: Case of Roorkee, Aditya Rahul and Mahua Mukherjee, Indian Institute of Technology Roorkee, India Indices of Outdoor Thermal Comfort: A Comparative Study in Mendoza, Argentina, M. Angélica Ruiz and Erica N. Correa, Instituto de Ambiente, Habitat y Energía INAHE – CCT CONICET Mendoza, Argentina Influence of urban form on urban thermal comfort of in tropical cities: Case of Goiania, Brazil, Loyde Viera Abreu-Harbich, School of Architecture and Urbanism of Presbyterian Mackenzie University, Brazil Evaluation of Indoor thermal comfort in scholar buildings of Federal University Goiás, D. S. Vale, M. L. Ebang, K. E. R Hora and Loyde Abreu-Harbich, School of Architecture and Urbanism of Mackenzie Presbyterian University, Brazil Microclimate influences on the indoor thermal comfort of scholar building on tropics: case of Cidade de Goiás- Brazil, P. J. L. Perillo, M. A. S Campus and Loyde Abreu-Harbich, School of Architecture and Urbanism of Mackenzie Presbyterian University, Brazil Vulnerability of Poor Urban Populations to Temperature-Related Health Issues in Ibadan, Betty O. Adegebo, University of Ibadan, Nigeria Future heat waves along latitudinal transect across Europe based on climate change indicators, Andreas Krein, Klaus Görgen and Jürgen Junk, Luxembourg Institute of Science and Technology (LIST) Environmental health, Luxembourg Immediate impacts of extreme winter weather on mortality in the Czech Republic, Eva Plavovó and Aleš Urban, Institute of Atmospheric Physics CAS, Prague, Czech Republic Statistical modelling of combined ozone and temperature extremes in Central Europe, Sally Jahn and Elke Hertig, Regional Climate Change and Health Faculty of Medicine and Institute of Geography Augsburg University, Germany 127 High resolution meteorological station network in Swiss Cities: City Weather Monitoring and operational forecasts, Sebastian Schlögl, Ferdinand Briegel and Karl G. Gutbrod, meteoblue AG, Switzerland 158 Tension between Jews a		Mahdi and Abdou Saliha, Architecture and Bioclimatic Environment
Impact Analysis of Dynamic Bluespace on Human Biometeorology: Case of Roorkee, Aditya Rahul and Mahua Mukherjee, Indian Institute of Technology Roorkee, India Indices of Outdoor Thermal Comfort: A Comparative Study in Mendoza, Argentina, M.
